Part B. CV SUMMARY (max. 3500 characters, including spaces)

Dr Emilio J. González-Sánchez is Adjunct Professor, holding an accreditation as Assistant Professor (Prof Contratado Doctor), at the Department of Agricultural Engineering, Agroforestry Engineering Area (University of Cordoba, Spain). He is a member of the Research Group AGR- 126 Mechanization and Rural Technology. González-Sánchez's background is in sustainable agriculture and land management based on the principles of Conservation Agriculture, with a special focus on climate change mitigation, mechanization and environmental impact assessment. His PhD thesis was on: "The potential of Conservation Agriculture to mitigate climate change in Mediterranean areas".

González-Sánchez has been the general coordinator of several European Union funded projects, including the LIFE+ ClimAgri and the LIFE+ Agricarbon, which has been awarded by the European Commission as "Best of the Best". Dr González has been appointed as International Consultant on Conservation Agriculture and Climate Smart

Agriculture by the FAO in Armenia, Cuba, Turkey and Uzbekistan. González-Sánchez is a member of the International Conservation Agriculture Advisory Panel (ICAAP - Africa). He is the coordinator of the runoff team of the TOPPs Water Protection project in Spain. Since May 2000, González-Sánchez has been the Executive Manager of the Spanish Association for Conservation Agriculture / Living Soils (AEAC/SV), and since January 2006, he has been the Secretary General of the European Conservation Agriculture Federation (ECAF). Both NGOs promote the soil management “best practice” aspects of Conservation Agriculture, leading to the preservation and enhancement of agricultural land and its biodiversity at the Spanish and European levels respectively. The network of farmers within AEACSV comprises 10 regional groups and over 1,500 members. With member associations in Denmark, Finland, France, Germany, Greece, Ireland, Italy, Moldova, Portugal, Russia, Slovakia, Spain, Switzerland, Turkey and United Kingdom, ECAF represents the interests of the majority of the European Union's cropped farmland.

González-Sánchez has published widely and is a regular presenter of his work at national and international conferences. He is actively engaged in discussions with EU on the future of farming in Europe and has been a contributor of evidence-based assessments to discussions and decisions in support of CAP reforms. In Spain, during the past 20 years, González-Sánchez has been instrumental in supporting the transformation of some 1 Mha of perennial systems, and a similar area of cropland systems, to Conservation Agriculture. Dr González-Sánchez has been visiting researcher (9 months in total) at Centre for Environmental Policy - Imperial College London, and at ICAAM-Inst. Ciências Agrárias e Ambientais Mediterrânicas of the University of Evora.
