understanding of the different topics covered. To work on the didactic content, chats or videoconferences will be held, and specific questionnaires will be held in each theoretical session.

Resolution of exercises and practical problems would be maintained through videoconferences in synchronous sessions by Blackboard Collaborate or chats, and they would be delivered through a task enabled for each case.

Students will carry out a work group that they will upload through a task, and that they will later present through videoconference.

The students will carry out an individual work that they will upload through a specific task.

## ADDENDUM TO THE COURSE DESCRIPTION

### General clarifications on instruments for evaluation:

In the virtual course we will prioritize continuous assessment, and for this we will use the following methods and tools:

Exam-Objective test: The exams will be scheduled to assess the understanding of the content of each class, through questionnaires by the Moodle platform where the student selects the correct answer among several options in a controlled time. Continuous evaluation (40%).

The final exam will be taken by students who do not pass the subject through continuous assessment, and will consist of an online questionnaire. In the event that the number of students to be evaluated would be very small, the final exam could be done orally by videoconference.

Oral presentation: The students will present and discuss by videoconference, the work group that they will deliver through a Moodle task . Continuous evaluation (20%).

Practical problems resolution: Specific exercises will be carried out for each of the practices. The Moodle task will be used as an evaluation tool. Continuous evaluation (15%).

Check list. Continuous evaluation (10%)

Document analysis. The students will carry out an individual work in which they will have to analyze a document, and go deeper into its content, treating different points. The Moodle task will be used as an evaluation tool. Continuous evaluation (15%)

The final report calification for the course will be obtained by adding the calification obtained in each of the previous sections.
